------------------------------	-----------------------------------	--	--

† Note that Single Cab Chassis models do not come with tray.

~ Tare mass = unladen mass of vehicle with 10 litres of fuel, excludes tray body for Cab Chassis vehicles.

\*\* Guide only excludes tray.

∞ Towing capacity is subject to towbar/towball capacity. The capacity may be reduced if a non genuine Nissan towbar is fitted. The permitted download is directly related to the laden mass of vehicle. At the maximum laden mass of the vehicle (Gross Vehicle Mass - GVM), the maximum towball download is 80kgs.

△ Includes optional tray.

		Single Cab	Dual Cab
Towball download	Loaded Vehicle Mass		
80kg	GVM (All models)	GVM	GVM
150kg	Reduced loaded vehicle mass below GVM by	40kg	70kg
200kg	Reduced loaded vehicle mass below GVM by	110kg	125kg
250kg	Reduced loaded vehicle mass below GVM by	180kg	170kg

GVM = Gross Vehicle Mass

If the loaded vehicle mass is reduced as shown in the table, the towball download can be increased correspondingly. Accordingly, if the laden mass is 170kgs less than the GVM (Dual Cab models), a towball download of 250kgs is approved. Different trailer types and different trailer manufacturers have varying towball downloads. The customer will need to contact the trailer manufacturer for information as to the download. Nissan is not able to make any recommendation on the use or suitability of load-levelling or weight distribution devices to be fitted to the vehicle. Customers should contact the manufacturers of these devices for further information.
